Overview

Dual-Head Security Illumination

This dual-head LED outdoor security wall light is engineered for broad, reliable illumination of driveways, pathways, and building entrances. Equipped with an integrated, adjustable PIR motion sensor, it provides enhanced security and energy efficiency by activating only when movement is detected. Built with durable, weather-resistant materials, this fixture features adjustable light panels to allow for precise control over the beam angle and coverage area.

Technical Specifications

Performance Metrics

20 W

Total Power

80 lm/w

Luminous Efficacy

80 RA

Color Rendering Index

30000 H

Lifespan

Electrical Data

- Voltage: 200-240VAC 50/60Hz
- Power Factor: >0.5
- Non-isolated driver design
- LED Type: SMD 2835

Sensor and Optical

PIR Sensor Adjustability

Parameter	Range
LUX Sensitivity	3-2000 LUX
Activation Time	10S-10MIN
Detection Distance	3-8M

Beam Characteristics

120 °

Physical Properties

Durability & Construction

IP54 Weatherproof, PHOTODIFFUSION PC+ABS
