Product Overview

Dual Head Pickaxe Tool

This heavy-duty dual-head pickaxe is an essential tool for agriculture, landscaping, and construction. Featuring a forged steel head, it combines a broad adze blade for digging and chopping with a sharp pointed pick for breaking through hard soil, rocks, and stubborn roots. Designed for durability and efficiency, it is an ideal choice for preparing planting beds and managing garden debris.

Technical Specifications

Material	Forged steel
Coating	Corrosion-resistant red paint
Design Features	Dual-head design, Central eye for handle, Adze blade, Pointed pick

Usage & Application

Primary Applications

- Agriculture
- Gardening
- Landscaping
- Construction

Key Benefits

High durability • Wear resistant • High visibility • Corrosion resistant
