Overview

Dual-Lens 4K Dash Camera System

This advanced dual-lens dash camera system is designed for professional-grade vehicle monitoring, featuring a high-resolution 4K front camera and a secondary interior camera. Equipped with premium Sony sensors and a magnetic mounting system, it ensures clear video capture for both the road ahead and the vehicle cabin. With integrated GPS tracking, G-sensor technology, and parking monitoring, this device provides comprehensive security and documentation for fleet or personal vehicle management.
