Product Overview

High-Efficiency Dual Paddle Mixing

This all-stainless steel dual paddle mixer is engineered for the pharmaceutical, chemical, and food industries. It is specifically designed to handle powder or paste materials, excelling with high-viscosity substances that require superior homogeneity. The system features automated controls, including a programmable mixing timer and automatic stop function, ensuring consistent quality across every batch.

Technical Specifications

Control System

- Programmable mixing timer
- Automatic shutdown
- Electrical control panel
- Motorized discharge

Construction Material	Full Stainless Steel
Mixing Action	S-style counter-rotating paddles

Applications

Suitable Industries	Pharmaceutical, Chemical, Food Processing
Compatible Materials	Powders, Pastes, High-viscosity materials
