

Dual Panel Solar Street Light

This solar street light features dual photovoltaic panels for efficient solar energy conversion. The energy-efficient LED street light is attached to a sturdy pole via a curved arm, providing bright and reliable illumination.

Product Overview

High-Efficiency Solar Lighting Solution

This Dual Panel Solar Street Light is engineered for robust outdoor performance, offering a comprehensive lighting solution that requires no external power source. By utilizing high-quality polycrystalline solar panels and durable aluminum construction, the system ensures reliable and eco-friendly illumination. With an IP65 protection rating, it is built to withstand harsh environmental conditions while providing broad coverage for various professional applications.
