

Dual Pivot Bicycle Caliper Brake Set

This caliper brake set is designed for bicycles, providing reliable stopping power. It features a dual-pivot design for enhanced braking performance and modulation.

BK-707005

Overview

Dual Pivot Caliper Brake Set

This bicycle caliper brake set is engineered to provide reliable and consistent stopping power for a variety of cycling applications. Featuring a dual-pivot design, it delivers enhanced braking performance and superior modulation compared to single-pivot alternatives. The construction utilizes steel-reinforced resin for durability, ensuring long-lasting performance while maintaining a lightweight profile. Designed for easy installation and adjustment, this set is an ideal upgrade or replacement for road bikes, hybrid bikes, and other standard bicycle frames.

Technical Specifications

Design Type

Dual-Pivot

Adjustment Capabilities

- Dual spring tension adjustment
- Easy installation adjustment

Material

Steel-reinforced resin

Compatibility

Included Components

- Front Caliper
- Rear Caliper

Compatible Bicycle Types

Road Bikes, Hybrid Bikes, Standard Caliper Brake Frames
