

Dual-Pivot Caliper Brake Set for Bicycles

This caliper brake set features a dual-pivot design for enhanced stopping power. It is constructed from lightweight aluminum alloy for durability and includes adjustable brake pads.

Product Overview

High-Performance Braking Solution

This dual-pivot caliper brake set is engineered for enhanced stopping power and precise modulation. Constructed from high-quality, lightweight aluminum alloy, it offers excellent durability and corrosion resistance for long-term reliability. Designed for versatility, this set is an ideal upgrade for road, touring, and hybrid bicycles, ensuring consistent performance in diverse riding conditions.

Technical Specifications

Material	Light alloy
Adjustment Features	Dual linear spring tension, Adjustable brake pads

Compatibility

Compatible Bicycle Types

- Road bikes
- Touring bikes
- Hybrid bicycles

Performance

Key Features

Dual-pivot design • Corrosion resistant • Enhanced modulation
