

Dual-Setting Handheld Garment Steamer with Hanging System

This steam iron machine features a double file regulation system, allowing users to adjust the steam intensity based on fabric type. The machine is equipped with a hanging system for easy steaming of clothes directly on hangers.

Product Overview

Professional Garment Care

The NV318 handheld garment steamer is designed to deliver professional-grade wrinkle removal in a convenient household format. Featuring a versatile double-file steam regulation system, this unit allows users to precisely adjust steam intensity to suit various fabric types, from delicate silks to heavier garments. The integrated hanging system simplifies the steaming process, enabling efficient vertical ironing directly on hangers.
