

Dual Shaft Horizontal Mixer

High-efficiency horizontal double-shaft mixer designed for food and beverage applications. Features robust construction with dual rotating shafts for thorough and uniform mixing of various materials.

Overview

High-Efficiency Horizontal Mixing Solution

This horizontal double-shaft mixer is engineered for high-performance mixing across diverse industries including feed, grain, food, chemical, and pharmaceutical processing. Featuring a dual-shaft design, it ensures high mixing uniformity and efficiency for various powder-type materials. The system is equipped with an advanced double-discharging door mechanism, facilitating rapid material output with minimal residue.

Technical Specifications

Mixer Type	Horizontal Double-shaft
Suitable Industries	Feed, Grain, Food, Chemical, Pharmaceutical
Compatible Materials	Powder-type materials

Key Features

Performance Highlights

- High mixing efficiency
- High mixing uniformity
- Multiple liquid addition capability
- Rapid discharge mechanism
- Low-residue discharge design
