

Dual Suspension Mountain Bike

This mountain bike features a dual suspension frame for enhanced shock absorption and control. It is equipped with front suspension forks, knobby tires, and multiple gears for versatile riding in off-road conditions.

Overview

Rugged Dual Suspension Performance

The Storm 4.0 is a versatile 21-speed mountain bike designed to deliver enhanced shock absorption and control on challenging off-road terrain. Featuring a durable high-tensile steel frame and dual suspension, this bike ensures a smooth riding experience for both adventure seekers and recreational cyclists. Its reinforced braking system and alloy double-wall rims provide the reliability and stability required for diverse trail conditions.
