Product Overview

Dual-Tank High Performance Softening

This cabinet-style water softener features an innovative dual-tank design that ensures a continuous, 24-hour supply of soft water. By operating in parallel, the system delivers high flow rates suitable for the daily consumption needs of 4-6 people. The unit is designed for residential efficiency, utilizing intelligent regeneration to optimize salt and water usage.

Technical Specifications

System Design	Cabinet-style with dual-tank parallel operation
Capacity	6 people
Smart Features	Continuous Supply, Salt Shortage Alarm, On-Demand Regeneration, Digital Control Interface
Customization	Yes
