Product Overview

Professional Dual-Tank Frozen Beverage System

This high-performance slush machine is engineered for commercial reliability and versatility, capable of dispensing slushes, milkshakes, and sherbets. Featuring a patented torque control system with a brushless DC motor, it ensures consistent results across various environmental conditions. The dual-tank design allows for simultaneous preparation of different flavors, while the advanced electronic controller provides precise temperature management and intelligent fault protection.

Technical Specifications

Refrigerant	R404a, R290, CFC-free
Motor System	Brushless DC motor with patented torque control
Cooling Control	Patented semi-frequency variable technique with electronic expansion valve

Build & Design

Maintenance Features

- Removable tank and handle for easy cleaning
- Drip tray with float indicator
- LED illumination
- Digital temperature display

Tank Material	Food-grade high-density anti-cracking polycarbonate
