

Dual-Texture Medical Cushion

This cushion features a dual-textured design with a dense, short-pile fur center for comfort. A plush, long-pile fur frame provides a supportive edge, making it suitable for medical or pharmaceutical settings.

Product Overview

Dual-Texture Medical Cushion

The Dual-Texture Medical Cushion is designed to provide superior comfort and support in clinical or pharmaceutical settings. Featuring a unique dual-textured surface, it combines a dense, short-pile tan center with a plush, creamy white long-pile border to ensure patient comfort. Constructed with materials suitable for hygiene-conscious environments, this cushion offers an ideal balance of softness and stability for medical equipment or patient use.
