Product Overview

Dual USB charger socket with integrated digital voltmeter and QC 3.0 fast charging capability.

Dual USB Charger & Voltmeter Panel

This 2-in-1 panel combines a high-efficiency QC 3.0 dual USB charger with a precise digital voltmeter, designed for versatile automotive and marine applications. Constructed from flame-retardant ABS+PC materials, it ensures safety and durability in demanding environments. The modular design allows for customizable configurations, making it an ideal solution for RVs, boats, and commercial vehicles.

Technical Specifications

Durable construction suitable for harsh marine and automotive environments.

| | |
|-----------------------|--------------------------|
| Material | ABS+PC (Flame Retardant) |
| Input Voltage | 12V-24V DC |
| Voltmeter Range | 5-30V |
| Operating Temperature | -20°C to +70°C |
| Warranty | 12 Months |

Features & Performance

High-visibility digital display for real-time voltage monitoring.

Charging Performance

3 A

5V Output

2 A

9V Output

1.5 A

12V Output

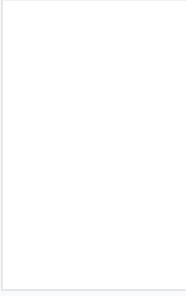

LED Indicator

Blue LED

Package Contents

- 1x Combination Panel (Charger + Voltmeter)
- 4x Blue Terminals
- 4x Self-tapping Screws

Installation & Compatibility

Panel designed for clean installation in automotive and marine dashboards.

Modular design allows for easy assembly and wiring.

Suitable Applications

Bus, Car, Boat, Yacht, RV, Caravan
