

Dual VGA USB KVM Extender 300m

This KVM extender supports dual VGA, keyboard, mouse, and speakers. It allows access to a computer system from a remote console, using Cat 5e/6 cable to connect the local and remote units up to 300 meters.

Product Overview

Dual VGA USB KVM Extender

This dual VGA USB KVM extender provides reliable remote access to computer systems, allowing control from a console up to 300 meters away. It supports dual VGA video, keyboard, mouse, and speaker connectivity, making it an ideal solution for extended workstation setups. By utilizing standard Cat 5e/6 cabling, it ensures a clean and efficient connection between local and remote units.
