

# Dual Voltage Inverter Arc Welding Machine

This is a compact and powerful inverter arc welding machine suitable for professional and DIY welding. It features micro-process digital control and is compatible with both acid and alkaline MMA electrodes.

## ADDITIONAL IMAGES

## Product Overview

### Professional Dual Voltage Inverter Welder

This portable inverter arc welding machine is engineered for high-performance welding in professional, construction, and maintenance environments. It features advanced intelligent monitoring and digital control to ensure stable arcs and superior welding results. With built-in safety features like VRD and protection against overheating and overloads, it provides reliable operation for both acid and alkaline electrode rods.

## Performance & Technical

### Welding Current Range

<b>140 A</b> Minimum Current	<b>200 A</b> Maximum Current
---------------------------------	---------------------------------

### Smart Functions

- Hot Start
- Arc Force
- Anti-Stick
- Automatic Power Off (30 min idle)

### Compatible Electrodes

Acid Electrode, Alkaline Electrode

## Safety & Protection

### Integrated Protection

Overload Protection • Overheat Protection • VRD (Voltage Reduction Device)

## Applications

### Recommended Usage

Metal Workshops, Construction, Repair & Maintenance, DIY
