

Dual-Zone Commercial Induction Cooktop

This commercial induction cooktop features a dual-zone design with independent controls for each cooking area. Each zone has a digital display showing the current power level, temperature, or timer settings.

Overview

High-Performance Commercial Induction Cooking

This dual-zone commercial induction cooktop is engineered for the rigorous demands of professional kitchens and catering environments. Featuring a robust SUS304 stainless steel housing and anti-corrosion glass top, it offers both durability and ease of maintenance. With independent controls for each cooking zone, chefs can precisely manage power, temperature, and timing for optimal culinary results.
