

Dual-Zone Wine Display Refrigerator

This wine display refrigerator is designed for storing and showcasing wine collections. It features dual-zone temperature control, wooden shelves, a wine glass compartment and a glass door to protect from UV rays.

Product Overview

Dual-Zone Precision Cooling

This professional-grade display refrigerator features a dual-zone temperature control system, specifically engineered to store red and white wines at their ideal conditions simultaneously. The unit combines aesthetic appeal with functional security, utilizing a UV-protected glass door and integrated LED lighting to showcase your collection. Equipped with a digital control interface and robust locking mechanism, it offers both ease of use and peace of mind for high-end wine storage.
