

Ductile Iron Pipe Fitting

These ductile iron fittings are designed for use in piping systems. Their durable construction provides high strength and corrosion resistance for water, gas, and sewage applications.

Product Overview

Durable Ductile Iron Piping Solutions

These high-quality ductile iron pipe fittings are engineered for reliable performance in demanding piping systems, including water, gas, and sewage applications. Constructed from robust ductile cast iron, they offer exceptional strength, corrosion resistance, and a long service life. Designed to comply with the EN545 standard, these fittings ensure safety and durability for critical infrastructure projects.

Technical Specifications

Pressure Rating

PN10 • PN16

Available Configurations

- Bends
- Tees
- Reducers
- Crosses
- Caps

Key Features

- High corrosion resistance
- Anti-fire properties
- Long service life
- High strength construction

Material

Ductile Cast Iron

Standards

EN545

Application Data

Suitable Applications

Water Systems, Gas Systems, Sewage Systems, HVAC&R Systems
