

Ductile Iron Pipe Fittings for Water Supply

These ductile iron fittings are designed for municipal water supply engineering. Their protective coating, typically blue, prevents corrosion and extends the service life.

Product Overview

High-Performance Ductile Iron Fittings

These ductile iron fittings are engineered for municipal water supply and water processing applications. Designed for durability and longevity, they feature a protective blue coating to prevent corrosion in demanding environments. These robust components are suitable for large-scale engineering contracts and meet stringent international quality standards.

Technical Specifications

Material	Ductile Iron
Primary Application	Municipal Water Supply and Water Processing
Available Size Range (DN)	DN80 - DN2600mm
Surface Finish	Anti-corrosion protective coating (Blue)

Compliance & Quality

Quality Certifications	ISO 9001, ISO 14001, GB/T 28001, BV Certified, KS Certified
------------------------	---

Logistics & Handling

Packaging	Securely packaged in wooden crates
-----------	------------------------------------
