

Ductile Iron Pipes with Alumina Cement Lining

These ductile iron pipes are manufactured to EN598-2007 standards. The high alumina cement lining provides enhanced corrosion resistance and durability for sewage treatment engineering.

Product Overview

High-Performance Ductile Iron Piping

These ductile iron pipes feature a specialized high alumina cement lining, specifically engineered to provide superior corrosion resistance and durability. Designed for demanding sewage treatment engineering applications, they offer reliable performance in harsh environments. With a wide range of specifications available, these pipes are built to meet rigorous international standards for infrastructure projects.

Technical Specifications

Available Lengths

- 6 meters
- 8.15 meters

Diameter Range (DN)

DN80 - DN2600mm

Internal Lining

High Alumina Cement

Certifications & Standards

Certifications

ISO 9001, ISO 14001, GB/T28001, BV Certified, KS Certified

Production Capabilities

Annual Capacity

38000 km

Annual Pipeline Capacity

Application

Primary Application

Sewage treatment engineering
