

Ductile Iron Truck Carrier

This ductile iron truck carrier is designed for use in trucks and construction machinery. It weighs 43.25kg and features precision-machined components for optimal performance and durability.

Product Overview

Heavy-Duty Ductile Iron Carrier

This high-performance carrier is engineered for demanding applications in truck and construction machinery. Manufactured using advanced casting processes, it delivers exceptional durability and reliability under rigorous operational conditions. Designed to meet precise specifications, this component ensures optimal performance for heavy-duty vehicle systems.

Technical Specifications

Dimensional Data

Parameter	Value
Hole Dividing Round	426
Diameter	395
Bore Diameter	170

Material	Ductile Iron Casting
Weight	43.25 kg

Manufacturing & Logistics

Max Production Capacity

30000 pcs/month
Capacity

Delivery Ports

- Shanghai
- Wuhan

Certifications	ISO, TS
Place of Origin	Suizhou, Hubei Province
Packaging	Wood pallet or as per customer requirements
Design Customization	Yes
