

Ductless Air Conditioning Unit with Adjustable Temperature Control

This ductless air conditioning unit offers economical energy consumption with user-defined run times. The unit's temperature range can be set and locked, preventing wasteful operation and maintaining a consistent environment.

Product Overview

High-Efficiency Ductless Air Conditioning

This advanced ductless air conditioning unit features a record-breaking 185 mm ultra-thin fuselage, making it the thinnest indoor machine in its class. Designed for energy efficiency, it includes intelligent time-setting controls and temperature range locking to prevent operational waste. Its sleek design allows for seamless integration into professional environments while maintaining optimal performance.

Technical Specifications

Unit Thickness	185 mm
Installation Type	Ductless, Indoor, Ceiling/Concealed

Operational Features

Energy Management Capabilities

- Programmable run-time settings
- Temperature range restriction
- Temperature set-point locking
- Error prevention controls
