

Durable Knee Pads with Reinforced Cap

These knee pads are designed for comfort and protection during kneeling tasks. They feature a durable plastic cap riveted to a fabric base and adjustable straps for a secure fit.

Overview

Professional Knee Protection

These durable knee pads are engineered for professionals who require reliable protection during demanding tasks. Featuring a robust polypropylene cover and comfortable EVA foam cushioning, they provide excellent impact resistance and support. The design is CE approved, ensuring they meet essential safety standards for workplace use.
