

Durable Plastic Water Storage Tank

This orange plastic water storage tank is designed for various applications. Constructed from high-quality, UV-resistant polyethylene, it ensures long-lasting performance and prevents degradation from sunlight exposure.

Product Overview

Robust Water Storage Solution

This durable orange plastic water storage tank is engineered for versatility and long-term reliability in various environments. Constructed from high-quality, UV-resistant polyethylene, the tank is designed to withstand harsh sunlight exposure without degradation. Its seamless cylindrical design optimizes space utilization while ensuring a safe, leak-proof solution for potable water, rainwater harvesting, or industrial liquid storage.

Technical Specifications

Material	UV-resistant polyethylene
Design Features	UV-resistant, Seamless construction, Cylindrical shape, Leak-proof

Applications & Use

Suitable Applications

- Potable water storage
- Rainwater harvesting
- Industrial liquid storage
- Residential use
- Commercial use
- Agricultural use
