

Durable Rubber Encased Steel Measuring Tape

This measuring tape is encased in robust rubber for enhanced grip and impact resistance. The high-quality steel tape extends to 30 meters and features clear, easy-to-read markings in both metric and imperial units.

Product Overview

Professional Grade Long Steel Tape

This contractor-grade measuring tape is engineered for high-demand environments in construction and engineering. Featuring a rugged, rubber-encased steel frame, it offers superior impact resistance and a secure grip during heavy-duty use. The 30-meter blade provides extensive reach for large-scale projects while maintaining clear, precise markings for both metric and imperial measurements.

Technical Specifications

Tape Length

30 m

Total Length

Unit Systems

- Metric
- Imperial

Tape Width

10 mm

Material Composition

Steel, Rubber Casing

Model Number

CR-3002

Features

Key Benefits

Impact Resistant • High Durability • Easy-to-Read Markings • Professional Grade
