

# Durable Rubber Speed Bump for Traffic Calming

This rubber speed bump is designed to reduce vehicle speed, ensuring safety in various environments. It features alternating yellow and black segments to enhance visibility and has pre-drilled holes for straightforward installation.

## Overview

### Durable Traffic Calming Solution

This durable rubber speed bump is engineered to effectively reduce vehicle speed in high-traffic areas. Designed for maximum visibility, it features alternating yellow and black segments to alert drivers immediately. The robust construction ensures reliable performance in parking lots, driveways, and private roads, significantly enhancing pedestrian safety.

## Design & Construction

Material	Durable rubber
Color Scheme	Yellow, Black

## Installation

### Installation Features

- Pre-drilled holes for easy installation

## Applications

### Recommended Applications

Parking Lots • Driveways • Private Roads

Primary Function	Traffic calming and pedestrian safety
