

Durable Windshield Wiper Blade for All Weather

This windshield wiper blade is designed for optimal performance in all weather conditions. Its robust construction and precision-engineered rubber blade ensures clear visibility and streak-free wiping.

Product Overview

High-Performance All-Weather Visibility

The Yada-916 is a robust windshield wiper blade engineered for consistent performance across all climate conditions. Its aerodynamic profile prevents wind lift at high speeds, while the precision-cut rubber ensures a streak-free wiping experience. Built for longevity, this blade resists environmental wear such as cracking and tearing to maintain clear visibility and road safety.

Key Features

Performance Features

1 All-Weather
Weather Compatibility

100 % Consistent
Surface Contact

Technical Details

Design Features

- Aerodynamic shape to minimize wind lift
- Precision-engineered rubber blade
- Universal fit for various vehicle makes

Installation

Universal adapter system

Material Characteristics

Crack Resistant, Split Resistant, Tear Resistant
