Product Overview

Professional Surface Finishing Solution

This high-performance floor finishing machine is engineered for professional-grade surface preparation, including epoxy resin, granite, and concrete. Featuring a powerful air-cooled 4-cycle gasoline engine, it delivers consistent power for edge grinding and leveling tasks. The unit is designed with a dust-free operation system to maintain a clean working environment while ensuring smooth, even surface results.

Technical Specifications

Maximum Output

1.2 KW
Max Output

1.6 HP
Max Output

Engine Type	Air-cooled, 4-cycle, Gasoline
Maximum Speed	5200 rpm
Exciting Force	1200 N
Darby Length	3000 mm
Total Weight	35 kg
Dimensions (L*W*H)	3100 x 1400 x 960 mm

Features

Compatible Surfaces

Epoxy Resin • Granite • Concrete

Key Features

Dust-Free Operation, Edge Grinding, Centrifugal Clutch, Ergonomic Handle, High Durability
