Product Overview

Industrial-Grade Dust-Proof Lighting

This linear LED fitting is engineered specifically for dust-prone environments, featuring a robust, fully enclosed housing that shields internal components from debris ingress. Constructed with a durable polycarbonate diffuser, it provides uniform light distribution and high impact resistance. It is an ideal solution for industrial settings, warehouses, and parking garages, offering energy-efficient illumination that reduces long-term maintenance costs.

Technical Specifications

Protection Features	Dust-resistant, Moisture-resistant, Enclosed housing
Materials	Polycarbonate diffuser
Installation	Surface mounting

Applications

Suitable Environments

- Industrial settings
- Warehouses
- Parking garages
- Commercial facilities
- Residential areas
