Product Overview

Professional Dutch Hoe

The Dutch Hoe is a precision gardening tool specifically engineered for efficient weeding and soil cultivation. Its distinctive flat, rectangular blade allows users to skim just beneath the soil surface, effectively severing weed roots without disrupting the deeper soil structure. This design makes it an ideal choice for maintaining tidy garden beds and preparing optimal seedbeds for planting.

Design & Utility

Ideal Applications

- Garden maintenance
- Seedbed preparation
- Surface weed removal

Primary Use	Weeding and soil cultivation
Key Features	Flat rectangular blade, Long handle, Soil-structure friendly
