

# DVB-S MPEG-2 FTA Receiver

This digital TV receiver supports DVB-S and MPEG-2 for free-to-air channels. It has an HDMI output, USB port, and EPG in a compact design.

## Overview

### DVS-3501 FTA Receiver

The DVS-3501 is a reliable digital satellite receiver designed for standard definition MPEG-2 decoding. As a Free-to-Air (FTA) unit, it provides straightforward access to unencrypted satellite broadcasts. With a compact 200mm form factor and versatile connectivity options, this receiver is an efficient solution for basic satellite television setups.
