

DVB-T Dual Tuner Receiver

This DVB-T dual tuner is engineered for receiving digital terrestrial television broadcasts. It features dual tuner capability for simultaneous recording and viewing.

Overview

High-Performance Digital Reception

This DVB-T dual tuner receiver is designed to deliver superior digital terrestrial television reception. Featuring advanced dual tuner capability, it allows users to simultaneously watch one channel while recording another. With robust support for MPEG-2 and MPEG-4 decoding, it ensures compatibility with a wide range of free-to-air digital broadcasts and provides enhanced picture quality for your home entertainment system.

Technical Specifications

Video Decoding Standards	MPEG-2, MPEG-4
Tuner Configuration	Dual Tuner

Connectivity

Output Interfaces

- HDMI
- Composite Video
- Digital Audio Output

Key Features

Core Benefits

Simultaneous Recording & Viewing • Enhanced Picture Quality • Reliable Reception • Easy Integration
