Overview

Compact Cooling Solutions for Electronics

These cooling fans are specifically engineered for DVR systems and various electronic components requiring reliable thermal management. Designed with a standard square frame and integrated mounting holes, they offer straightforward installation and efficient airflow for heat dissipation. Available in multiple compact dimensions, these units help maintain optimal operating temperatures to ensure the longevity and performance of your electronic equipment.

Technical Specifications

Available Dimensions

Length (mm)	Width (mm)	Depth (mm)
80	80	20
70	70	15
60	60	25

Design Features

- Square frame design
- Integrated mounting holes
- Optimized fan blades for airflow

Primary Applications

DVR, Electronic Devices, Thermal Management, Computer Spare Parts
