

DWDM Optical Add Drop Multiplexer Module

This wavelength multiplexer achieves optical add or drop at an ITU wavelength. The module uses thin film coating technology and a non-flux metal bonding micro optics packaging design.

Overview

High-Performance DWDM Multiplexing

The 100G DWDM 4+1CH-Demux Module is a precision-engineered optical component designed for dense wavelength division multiplexing (DWDM) systems. It provides 4 dedicated channels plus an additional upgrade port (UPG) to facilitate flexible network expansion and increased bandwidth capacity. This module is an essential solution for optimizing communication network infrastructure.

Technical Specifications

Supported Channels

- CH34
- CH35
- CH36
- CH37

Module Type

100G • DWDM • Demux

Channel Configuration

4 Channels + 1 Upgrade Port (UPG)

Identification

Part Number

DWDM 4+1CH-Demux

Serial Number

14081899002
