

Dynamic Wired Microphone with Zinc Alloy Construction

This dynamic wired microphone is designed for capturing vocals and instruments. It features a metal construction with spray-painted zinc alloy for enhanced durability.

Product Overview

Professional Dynamic Microphone

This wired microphone features a durable zinc alloy construction with a spray-painted finish, designed for reliability in demanding environments. It utilizes a dynamic capsule with uni-directional directivity to ensure clear audio capture while minimizing background noise. Ideal for diverse applications including KTV performances, family entertainment, and various outdoor activities.

Technical Specifications

Frequency Response	50-14000Hz
Sensitivity	-74 dB
Impedance	600 Ω

Construction & Design

Microphone Type	Dynamic
Directivity	Uni-directivity
Housing Material	Zinc Alloy with spray painting

Application Suitability

Ideal Applications	KTV Performance, Family Amusement, Outdoor Activities
