Product Overview

Advanced Control with Real-Time Monitoring

This half-twist throttle is designed for electric bikes and scooters, offering precise speed control and integrated battery management. It features a built-in LED digital display that provides real-time voltage readings, allowing riders to monitor their power levels accurately. Compatible with a wide range of systems from 12V to 72V, it ensures a versatile and reliable upgrade for various electric mobility applications.

Technical Specifications

The integrated LED display provides immediate voltage feedback for better battery management.

Operating Voltage Range

12 V Minimum Voltage	72 V Maximum Voltage
--------------------------------	--------------------------------

Display Technology	LED Digital Voltage Display
Throttle Design	Half Twist

Applications

Compatible Vehicles

E-Bike, Electric Scooter, Electric Motorcycle

Features & Benefits

Key Features

- Real-time battery voltage monitoring
- Precise speed control
- Ergonomic half-twist grip
- Easy installation process
- Durable construction for long-term use

Safety & Management

Enables optimal battery management and improved rider safety through accurate power status updates.
