Overview

Universal E-Bike Control Solution

This high-performance twist grip throttle is designed for electric bikes and scooters, offering a comprehensive control interface. It integrates a precise speed throttle with a secure key-operated power lock and a real-time LED digital voltage display. Compatible with a wide range of electrical systems from 12V to 72V, it provides riders with essential battery monitoring and enhanced security in a single, durable component.

Technical Specifications

Operating Voltage

12 V

Min Voltage

72 V

Max Voltage

Key Features

The integrated LED display provides real-time voltage monitoring for battery safety.

Integrated Components	Twist Grip Throttle, Power Lock, LED Digital Display, Security Keys
Display Type	LED Digital Voltage Monitor
Security System	Key-operated power lock for ignition control

Compatibility & Application

Compatible Vehicles

- Electric Bicycles (E-Bikes)
- Electric Scooters
- ZTECH Electric Bikes

Design & Ergonomics

Ergonomic textured grip ensures precise speed control and comfortable handling.

Construction

Durable Materials • Long-lasting Reliability

Grip Design	Textured surface for enhanced control and comfort
