

E-Reader with E-Ink Display and Touchscreen

This e-reader features a large e-ink display on the top and a smaller color LCD touchscreen at the bottom. It is designed for portable use, combining reading comfort and interactive functionality.

Product Overview

Dual-Display E-Reader Technology

This versatile e-reader device is engineered for both reading comfort and interactive functionality. It features a large, eye-friendly E-Ink display on the upper portion, ideal for focused reading, paired with a responsive color LCD touchscreen at the bottom. This dual-interface design allows users to enjoy the benefits of paper-like reading alongside the modern capabilities of an application-supported operating system.
