Product Overview

Energy-Efficient Chandelier Lighting

This LED chandelier bulb combines classic aesthetic appeal with advanced energy-saving technology. Designed for both durability and performance, it features a unique heat sink forged from high-conductivity aluminum to ensure a long lifespan. With its flicker-free operation and universal voltage compatibility, this bulb offers a reliable and environmentally friendly lighting solution for diverse applications.

Technical Specifications

Base Compatibility	E14, E27
Voltage Compatibility	Full voltage (Universal)
Driver Design	Continuous current

Design & Construction

Heat Sink Material	International standard aluminum
Housing Material	High light transmittance glass
Lighting Direction	5-sided illumination

Key Features

Environmental Features

Mercury-free • No UV radiation • No infrared radiation

Operational Quality

- Flicker-free operation
- No dazzle light
- Even and soft light distribution
- High heat dissipation efficiency
