

Earth Leakage Circuit Breaker

This earth leakage circuit breaker is designed for industrial and machinery applications. It provides protection against electrical faults and leakage currents.

Product Overview

Industrial Safety Solution

This Earth Leakage Circuit Breaker is engineered for robust protection in industrial and machinery environments. It provides reliable defense against electrical faults and hazardous leakage currents, ensuring operational safety for critical equipment. Equipped with manual control and functional test features, it is designed for seamless integration into industrial power systems.

Electrical Ratings

Rated Voltage

400 V

Rated Voltage

Rated Current

63 A

Rated Current

Leakage Current Trip

0.3 A

Standards & Compliance

Compliance Standards

IEC61008-1, GB16916.1-2003

Features

Functional Features

- Manual On/Off switch
- Integrated test button for functional verification
- Industrial-grade leakage protection

Application

Typical Applications

Apparel Machinery • Textile Machinery • Industrial Equipment
