Earth Moving Equipment Set

This equipment is designed for moving earth and other materials on construction sites. It includes loaders, excavators, and bulldozers.

Overview

Heavy-Duty Material Handling

This earth moving and material handling equipment is engineered for demanding industrial and construction environments. Featuring a robust mast construction, durable forks, and a protective overhead guard, it prioritizes both operational efficiency and operator safety. With a powerful engine and a reliable hydraulic system, this machinery is designed to handle heavy loads with precision across diverse terrains.

Technical Specifications

Terrain Suitability

Industrial • Construction • Outdoor

Equipment Type	Forklift / Material Handling
Safety Features	Overhead Guard, Heavy-Duty Mast, Hydraulic Stability
