

Earth-Moving Excavator

This heavy-duty excavator is used for loading soil and other materials. It is designed for material extraction and transportation in mining and construction operations.

Overview

High-Performance Earth-Moving Excavator

This heavy-duty earth-moving excavator is engineered for demanding environments such as large-scale mining and construction operations. Designed for efficiency and durability, it excels in material extraction and loading tasks, providing reliable performance under rigorous work conditions. Its robust construction ensures long-term operational stability for professional earthmoving projects.

Key Metrics

Operational Capability

1 Material Loading

Primary Function

Primary Application

Mining, Construction, Earthmoving
