

Earthmoving Bulldozer for Construction

This heavy-duty bulldozer is designed for earthmoving and site preparation. It features a robust blade and durable tracks for stability and traction on various terrains.

Overview

Heavy-Duty Earthmoving Capability

This heavy-duty bulldozer is engineered specifically for demanding earthmoving, grading, and site preparation tasks. Equipped with a robust blade and a powerful engine, it is designed to move large volumes of material efficiently across construction, mining, and agricultural sites. The machine features durable tracks that ensure superior stability and traction on challenging terrains, while the operator cabin is optimized for enhanced visibility and ergonomic control.

Technical Specifications

Model Number	T140-1
Primary Applications	Construction, Mining, Agriculture, Earthmoving, Grading

Key Features

Performance Highlights

1 Heavy-Duty
Traction System

1 High-Volume
Blade Capacity

Operator Features

- Enhanced cabin visibility
- Ergonomic control layout
- Stable operation platform
