

Earthmoving Bulldozer for Construction

This heavy-duty construction bulldozer is designed for earthmoving and site preparation tasks. It features a robust blade for pushing and leveling materials, along with a powerful engine and durable tracks for optimal performance in demanding environments.

Overview

Heavy-Duty Earthmoving Performance

The BX320L bulldozer is a robust construction machine engineered specifically for demanding earthmoving and site preparation tasks. It features a powerful engine and a durable track system designed to maintain optimal performance in challenging environments. With a focus on operator safety and comfort, this unit is an ideal solution for large-scale construction, mining, and agricultural projects.

Key Metrics

Model	BX320L
Primary Applications	Construction, Mining, Agriculture, Site Preparation

Features

Design Highlights

- Robust blade for pushing and leveling
- Durable track system
- Protective operator cab
- High-performance engine
