

Earthmoving Excavators

These heavy-duty excavators are designed for earthmoving and digging operations. Featuring caterpillar tracks and enclosed operator cabs, they are suitable for demanding construction site environments.

Overview

Heavy-Duty Earthmoving Excavators

These heavy-duty excavators are engineered for demanding construction site operations, including large-scale earthmoving and precision digging tasks. Equipped with robust caterpillar tracks, they offer superior stability and traction across various terrains. Each unit features an enclosed operator cab designed to enhance safety and comfort during long shifts, making them a reliable choice for professional construction fleets.

Technical Specifications

Equipment Class

Heavy-Duty • Construction Machinery

Primary Application

Earthmoving, Digging, Construction

Mobility System

Caterpillar Tracks

Operator Station

Enclosed Cab
