

EB-B Type Webbing Sling

This EB-B type webbing sling can be configured as a single or multi-layer belt with varied suture options. The flat lifting belt's bearing surface reduces surface pressure, making it suitable for delicate objects.

Product Overview

EB-B Type Webbing Sling

The EB-B type hoisting belt is a high-strength, versatile solution designed for safe and efficient load handling. Constructed from durable, woven synthetic fibers, these slings feature a smooth surface to protect delicate loads while maintaining a high strength-to-weight ratio. They are compliant with European EN1492-1:2000 and Chinese JB/T8521-2007 industry standards, ensuring reliable performance in demanding lifting environments.

Key Features

Features

- High strength-to-weight ratio
- Non-conductive material for safety
- Flat surface design to reduce pressure load
- Color-coded capacity identification
- Smooth surface protects delicate objects
- Lightweight and flexible for small spaces
- Optional PU hardened surface for wear resistance
- Optional protective sleeves available

Compliance & Standards

Standards

EN1492-1:2000, JB/T8521-2007

Technical Specifications

Load Capacity & Dimensions

Type	Straight Load (kg)	Width (mm)	Min Length (m)
EB-B-01	1000	25	1
EB-B-02	2000	50	1
EB-B-03	3000	75	1
EB-B-04	4000	100	1
EB-B-05	5000	125	1
