Product Overview

Reliable Power for ECG Diagnostics

This rechargeable battery pack is specifically engineered for portable ECG machines, ensuring continuous monitoring and diagnostic capabilities in various clinical settings. Constructed with high-quality cells, it delivers consistent performance and an extended operational life. The unit features a multi-wire connector for secure integration and reliable power delivery.

Technical Specifications

Performance Metrics

9.6 V Voltage	3800 mAh Capacity	637 g Weight
-------------------------	-----------------------------	------------------------

Battery Chemistry

Ni-MH • A4/3

Dimensions

134 x 69 x 18 mm

Color

Green/Blue

Compatibility

Compatible Models

- FCP-7101
- FX-7000
- FX-7101
- FX7102
- FX7402
- FX4010
- FX2201

Safety and Handling

Safety Instructions

- Do not throw into fire or expose to excessive heat
- Do not disassemble or modify
- Avoid dropping or applying strong impact
- Do not short-circuit the terminals
- Charge only on specified equipment
