Product Overview

Professional Edge Banding Adhesive

These hot melt adhesive granules are specifically engineered for wood and furniture agglutination applications. Designed for use in edge banding machines, the formula provides excellent adhesion, heat resistance, and flexibility. It ensures a durable, long-lasting bond suitable for various edge banding materials, including PVC, ABS, and wood veneer.

Technical Details

Physical Form	Cylindrical granules
Appearance	Translucent yellow

Compatibility

Compatible Materials	PVC, ABS, Wood Veneer
Application Method	Edge banding machine

Key Features

Performance Benefits

- High heat resistance
- Excellent flexibility
- Strong bonding strength
- Aesthetically pleasing finish
