

Edge Banding Machine for Woodworking

This woodworking machine is designed for edge banding applications. It applies edge banding material to the edges of wooden boards for a clean finish.

Product Overview

Professional Edge Banding Solution

The BJF-505W is a robust woodworking machine engineered for precise edge banding applications. It effectively applies edge banding material to wooden boards to ensure a professional, clean finish. Equipped with an intuitive control panel and digital display, the machine allows for high-accuracy operation, supported by a sturdy frame for long-term durability in professional shop environments.

Technical Specifications

Model	BJF-505W
Equipment Type	Edge Bander, Woodworking Machinery

Control and Operation

Control Features

- Integrated control panel
- Digital precision display
- Tactile operation switches
- Hands-free foot pedal control
